1. Software operating

- Hardware requirements: Phone with Bluetooth. Space disk can't less than 3G, and RAM can't less than 1G.
- Operating system: support Android above 4.4 .
- Network requirement: The software needs to be activated & downloaded online, so please make sure your internet is connected.

2. Software downloading

- Open the mobile browser, scan the QR code below and "visit";
- Download the app and install it.

3. Software activation

- First, please keep the network connection, run MDDIAG app and enter the home page of the app.

2

- Click "Update" to enter the login page.

- Please enter the product serial number and password in the password envelope and click "login". If the product is not activated, click "yes".

3

- after the information has been committed, please login your email to activate the product.

- You will receive a activated email from the MTDIAG server.

Dear Customer,

Please click the following link to activate your device:
http://activation_link/Interface/sendemail.aspx?sn=5517041123&pswd=...

Thank you!

- Please click the link to get the confirmation from the manufacturer.

Activate success.

4

4. Software downloads

- After activation, please enter the MTDIAG app again to obtain the software upgrade. Please click "login" to enter the software download interface.

- You can download the software you need.

5

BMW motor diagnostic connector

- BMW motor has two diagnostic interfaces, one is the standard OBDII-16 interface and the other is BMW 10 PIN connector.

If it is a round head 10PIN interface, connect the VCI with the BMW 10 PIN connector and test it, as shown in the figure below:

6

After-sale service

- Hardware quality problems caused by non-human reasons within one year shall be repaired free of charge.
- Free software upgrade and lifelong maintenance.
